

## (Senior) Business Intelligence Analyst (f/m/d)

### Description

### Company Description

Our goal is a solar power system on every roof, a storage unit in every house, and an e-car in every garage. How are we achieving this? Enpal makes solar easy: we sell solar power systems, electricity storage and EV Wallboxes at an all-inclusive rate, supplemented by a favorable green electricity tariff, and intelligently networked into an integrated overall solution.

We are just at the beginning of our journey to becoming Europe's largest energy company. That's why we're looking for talented people to accompany us on this journey, leave their footprint and celebrate successes together with us.

As the first green unicorn in Germany and the fastest-growing energy company in Europe (FT1000 Ranking 2022 by Financial Times & Statista), we continue to advance our mission of green energy for everyone. **Be part of this success story and change the world with us!**

### Job Description

#### What you'll do:

- Conduct operations research, overhaul a set of relevant KPIs and support process transformation in H2 2024 in partnership with the Director Logistics, the COO office, and the senior management.
- Analytically support material loss prevention projects by both identifying operational gaps and the assets left without attention.
- Develop deep knowledge of ERP data, use it to ensure adequate usage & design of ERP in collaboration with the Operational Excellence and the Digital Product teams so all material assets are unaccounted for, not stuck in process and delivered in full and on time.
- Automate logistics reporting by transitioning from Excel-based reports to a unified, automated system using our centralized data warehouse.
- Closely work with a group of seven stakeholders, conduct weekly meetings with them, ensure quarterly roadmap planning and drive prioritization.

### Qualifications

#### What you'll bring:

- **3+ years** of relevant experience as BI Engineer, BI Analyst or Data Analyst.
- High proficiency in SQL, [ETL](#) processes, and familiarity with BI tools like **Tableau, Power BI**, or similar. Our tech stack includes **dbt, Snowflake, Streamlit and Tableau**.
- Exposure to Python for data analysis (e.g. pandas).
- Strong analytical and problem-solving skills, with a proven track record of using data to improve business outcomes.
- Enthusiasm for working in dynamic, rapidly changing environments, with a commitment to operational excellence and innovation.
