

DevOps Engineer with big data

Description

Company Description

Mobica | Be Extraordinary_

We are Mobica, a global software services company headquartered in Manchester, UK, with offices across Europe and the USA. We partner with businesses across multiple industries, from aerospace to finance and semiconductors to automotive, providing them with access to engineering expertise across the entire technology stack.

The Mobica Way

- Well-known Clients and Projects focused on the Technologies of Tomorrow – Our expertly crafted software underpins many of today’s amazing customer experiences. We work with well-known global brands to develop widely used tech. When you join us, you’ll be both challenged and supported, and you’ll be a part of something extraordinary.
- Empowered Mobicans driving their Careers – We empower our people to develop their skills, push boundaries and move towards new heights. As a Mobicans, you’ll have ample opportunities to advance, learn and grow towards your desired career outcomes.
- Ideas are prioritised over Hierarchy and Biases – In Mobica, you are listened to and valued. We’ve built an environment that fosters open communication. We’ve made it our mission to ensure all team members feel welcome, protected from discrimination and have access to equal opportunities.

We believe that employees should be happy – At Mobica, you can define precisely how you would like to work – at home or in the office – we will create the environment for that. You’ll get access to various virtual, offline and on-site events and platforms where you can learn, brainstorm, challenge, express yourself or simply have some fun and make new friends.

Job Description

Our Customer is a leading global provider of cutting-edge payments technology solutions, dedicated to shaping the future of financial transactions worldwide. With a commitment to innovation and excellence, we connect consumers, businesses, financial institutions, and governments in over 200 countries and territories through our advanced processing networks.

This role requires a specialization in data engineering, covering analysis, data mapping, setup, data connection, crafting efficient data solutions to optimize data-driven decision-making processes within the organization, automation, quality assurance, documentation, and support for user dashboard updates. This also involves working closely with different teams across Europe, and the FBL clusters;

Diversity and Inclusion Statement

We aim to recruit, develop and retain the most talented people we can find from various backgrounds and cultures. Inclusivity and equality are cornerstones of our Mobicca community and a big part of what makes us so brilliant to work with. Here, dedication and performance are valued and rewarded regardless of nationality, gender, age, religious beliefs or other personal characteristics. Here, diversity is celebrated, and everyone belongs.

“The benefits of having a diverse workforce from different backgrounds, recruited and developed only on the basis of ability, is a core personal belief for me – so I join with other members of Mobicca’s leadership in promoting a commitment to recognise equal opportunities and rights for our talented individuals. Every Mobiccan can expect to be treated with dignity and respect regardless of personal characteristics or beliefs.”

Gary Butters
CEO

How the process will look like

Your teammates will gather all requirements within our organization. Then, once priority has been discussed, you will decide as a team on the best solutions and architecture to meet these needs. In continuous increments and continuous communication between the team and stakeholders, you’re part of making data play an even more important (and understood) part withing Brand New Day.
