

Power BI Developer

Description

The Job in short

As a Power BI Developer working in the Business Banking Value Stream in R&D, you will play a crucial role in transforming business data from our Engagement Banking Platform into insightful visualizations and reports. You will be responsible for designing, developing, and maintaining Power BI solutions that will be used by banks and customers of banks worldwide.

Meet the Job

- Data Visualization: Design and develop interactive and visually appealing Power BI dashboards and reports;
- Create custom visualizations together with our user experience designers;
- Data Integration: Collaborate with data engineers to integrate data from various sources into Power BI, ensuring data accuracy and consistency;
- Data Modeling: Create and maintain data models to support reporting and analytics needs;
- Performance Optimization: Optimize Power BI solutions for performance, scalability, and usability;
- User Training: Provide training and support to end-users on Power BI tools and best practices;
- Collaboration: Work closely with cross-functional teams to understand business requirements and deliver data-driven solutions;
- Documentation: Document Power BI solutions, including data models, reports, and dashboards, for future reference and training purposes.

How about You

- You have 4+ years of experience in Power BI development and data visualization;
- A bachelor's degree in Computer Science, Information Systems, Data Analytics, or a related field is preferred.

How the process will look like

Your teammates will gather all requirements within our organization. Then, once priority has been discussed, you will decide as a team on the best solutions and architecture to meet these needs. In continuous increments and continuous communication between the team and stakeholders, you're part of making data play an even more important (and understood) part withing Brand New Day.
