

Data Analyst (12 month contract)

Description

Company Description

Avery Dennison Corporation (NYSE: AVY) is a global materials science and digital identification solutions company that provides a wide range of branding and information solutions that optimize labor and supply chain efficiency, reduce waste, advance sustainability, circularity, and transparency, and better connect brands and consumers. Our products and solutions include labeling and functional materials, radio frequency identification (RFID) inlays and tags, software applications that connect the physical and digital, and a variety of products and solutions that enhance branded packaging and carry or display information that improves the customer experience. Serving an array of industries worldwide — including home and personal care, apparel, general retail, e-commerce, logistics, food and grocery, pharmaceuticals, and automotive — we employ approximately 35,000 employees in more than 50 countries. Our reported sales in 2023 were \$8.4 billion. Learn more at www.averydennison.com.

Please let us know if we can support you with reasonable accommodations throughout the application process by contacting our Talent Acquisition team via Requestaccomodation@eu.averydennison.com.

Avery Dennison is an equal-opportunity employer.

Job Description

This position will be based at our Thermopatch Sports UK production site reporting to the operational leader, delivering reliable and timely data to internal stakeholders across our Embelex organization. The data administrator will be responsible for the development of automation tools in terms of data collection, refinement and analytics to help the operation with solutions that reduce or eliminate non-value added time in terms of reporting, analyzing and making decisions based on data.

You must have a strong proficiency for data gathering, process creation and automation to drive improvements and efficiencies.

Your Responsibilities

- Create data gathering process tools for metric tracking
- Report the operations and service metrics in the global platforms
- Record and measure the performance of each operator in every product line
- Review in a monthly basis the low performance operators with the supervisors and develop action plans for improvement
- Facilitate metrics reportage to the shopfloor (UEE, Scrap, UPLH) and provide tools to control the manual input of information and prevent mistakes
