### Date posted

June 5, 2024

- Curious and proactive in learning about emerging technologies and their potential applications.
- Stay up-to-date with the latest trends in virtual coaching and generative AI, integrating relevant innovations into our product strategy.
- Strong interest and knowledge in generative AI and its applications in product development.
- Confidence to influence, communicate and build relationships with key stakeholders.
- Comfortable working with global, distributed teams (Product Management & Engineering primarily in EMEA).
- Knowledge and experience working with different variations of Agile/Scrum.
- Ability to operate at various “levels” – strategy vs. execution, problem vs. solution.
- Excellent prioritization and communication skills to deliver the right things on time.
- Exceptional analytical and problem-solving skills in a technical domain.
- Ability to communicate complex technical concepts to non-technical audiences.
- Ability to manage upwards, influencing senior leaders in the organization.
- Ability to review processes and drive change through continuous improvement.
- Full written and verbal English communication proficiency.

### **Nice to Have:**

- Experience or a strong interest in virtual coaching or online learning platforms. Highlight their ability to understand and improve the coaching experience through technology.
- Emphasize the importance of curiosity and knowledge about generative AI. Candidates should be keen to explore and integrate new AI techniques into product development.

### **How the process will look like**

Your teammates will gather all requirements within our organization. Then, once priority has been discussed, you will decide as a team on the best solutions and architecture to meet these needs. In continuous increments and continuous communication between the team and stakeholders, you're part of making data play an even more important (and understood) part withing Brand New Day.
