

Data Visualization Designer (UX/UI)

Description

Job Description

As our Data Visualization Designer (UI/UX Designer), you will be instrumental in building and supporting the US Data Visualization & Reporting capability, a vital component of the US Data Strategy for the US Commercial Organization at Biogen. Your role entails proficiently transforming raw data into informative and engaging visualizations.

What you will do

- Design and develop creative, user-friendly reports and dashboards using business intelligence tools (PowerBI).
- Collaborate with cross-functional teams to gather and understand requirements.
- Translate complex data into easy-to-understand visuals and reports.
- Continually identify ways of improving existing reports.
- Conduct user research, including user interviews, surveys, and usability testing, to gain insights into customer behavior, needs, and pain points.
- Organize report content and functionalities to ensure easy accessibility and intuitive interactions for different user segments.
- Plan and conduct usability testing sessions to validate design concepts and gather user feedback for continuous improvement.
- Communicate design concepts and decisions effectively to stakeholders.
- Work with data analysts to validate and troubleshoot data-related issues impacting reports and dashboards.
- Iterate designs based on user feedback, stakeholder input, and usability testing.
- Collaborate with development teams to ensure the seamless integration of UI elements.

Qualifications

Who you are:

- Proven experience as a Report Designer/Data Visualization Designer, with a strong reporting portfolio.
- Proficiency in data visualization tools such as PowerBI, Tableau, or QlikView.
- Experience working directly with Power BI (Cloud is a strong advantage).
- Practical knowledge of SQL queries (data analysis, aggregation functions, window functions) – nice to have.
- Pharmaceutical commercial data experience is an advantage.
- Strong eye for detail, color, layout, and typography.
- Solid understanding of user-centered design principles and methodologies, including user research, information architecture, and usability testing.
- Proficiency in English.
- Excellent communication and collaboration skills to work effectively with cross-functional teams.
- Strong analytical skills, with the ability to interpret data and user feedback to

Additional Information

At our newly built, centrally located Warsaw office, our team supports a global organization with dedication and innovation. In this office, where 31 nationalities form our community, we celebrate the strength that comes from differences in backgrounds, experiences, and perspectives. This commitment to fostering a supportive and inclusive workplace has earned us a Great Place to Work Certificate for three consecutive years and Best Places to Work Awards in both Poland and Europe.

What drives us every day is our unique purpose, working passionately to change the lives of patients affected by rare neurological diseases. If our mission resonates with your heart and career aspirations, join our team.

We eagerly anticipate welcoming you to our dynamic and collaborative environment, where together, we make a meaningful impact on a global scale.

Why Biogen?

We are a global team with a commitment to excellence, and a pioneering spirit. As a mid-sized biotechnology company, we provide the stability and resources of a well-established business while fostering an environment where individual contributions make a significant impact. Our team encompasses some of the most talented and passionate achievers who have unparalleled opportunities for learning, growth, and expanding their skills. Above all, we work together to deliver life-changing medicines, with every role playing a vital part in our mission. Caring Deeply. Achieving Excellence. Changing Lives.

At Biogen, we are committed to building on our culture of inclusion and belonging that reflects the communities where we operate and the patients we serve. We know that diverse backgrounds, cultures, and perspectives make us a stronger and more innovative company, and we are focused on building teams where every employee feels empowered and inspired.
