

Staff Data Engineer

Description

Company Description

Visa is a world leader in digital payments, facilitating more than 215 billion payments transactions between consumers, merchants, financial institutions and government entities across more than 200 countries and territories each year. Our mission is to connect the world through the most innovative, convenient, reliable and secure payments network, enabling individuals, businesses and economies to thrive.

When you join Visa, you join a culture of purpose and belonging – where your growth is priority, your identity is embraced, and the work you do matters. We believe that economies that include everyone everywhere, uplift everyone everywhere. Your work will have a direct impact on billions of people around the world – helping unlock financial access to enable the future of money movement.

Join Visa: A Network Working for Everyone.

Job Description

Visa Inc. is at the forefront of the Gen AI revolution, developing and executing a shared strategic vision for our Benefits, Loyalty and Marketing platforms. Our goal is to establish Visa as the world-leading data-driven payments company.

The successful candidate will be a full stack developer for a self-motivated individual with excellent software and data engineering skills and expertise in Java/Big Data technologies. The candidate will be extensively involved in hands-on activities including POCs, design, documentation, development, and testing. The candidate should be a motivated self-starter and quick learner.

This role will be part of Digital Marketing Experience, Benefits & Loyalty team in Value Added Services group at Visa.

Responsibilities

- Develop well-designed, easily testable, secure, manageable and high performant code
- Have a passion for delivering zero defect code and be responsible for ensuring the team's deliverables meet or exceed the prescribed defect SLA.
