

## Principal AI Engineer

### Description

#### About Beam

Beam is a tech start-up leveraging Generative AI and NLP to build AI Agents for business operations. Beam's generative agents help organisations to boost their productivity by automating repetitive tasks in seconds. Powered by LLMs, AI agents are easy to setup, seamlessly integrate with business applications and support teams where they need them most. We are on a mission to transform business practices by empowering organisations with artificial intelligence to increase efficiency, improve competitiveness, and scale operations globally.

#### About the Role

As a Principal AI Engineer, you will hold a central position in defining and executing the architectural vision and strategic direction of our AI-driven platform. Your role will encompass leading the development, optimization, and maintenance of our AI product, guiding the deployment of advanced machine learning algorithms and models, and ensuring their seamless integration into our backend systems. We are looking for someone who is passionate about building great products, has strong leadership skills, and is comfortable working in a fast-paced, startup environment.
