# MDM / Data Architect

**Description**

We are one of Europe's leading suppliers of clinical laboratory testing and medical diagnostic imaging services to private and public healthcare providers, local governments, insurance companies, pharmaceutical companies and the general public. We operate laboratory and medical diagnostic imaging facilities in 14 countries: Czech Republic, Denmark, Finland, France, Italy, Norway, Peru, Portugal, Slovakia, Spain, Sweden, Switzerland, UAE, and the United Kingdom. Our network of facilities provides us with one of the broadest geographic footprints of any clinical laboratory and medical diagnostic services provider in Europe.

As an MDM/Data Architect, you will work closely with business stakeholders and technical teams to ensure the proper management and governance of critical data assets. Your expertise in MDM, data modeling, data integration, and data quality will play a crucial role in optimizing data processes and ensuring data accuracy and consistency across the organization.

**Responsibilities**

Ownership of the Data Architecture for the D365 / Landing Zone solution:

- Development of Data Catalogue / taxonomy
- Development of Data Architecture
- Development of data management and maintenance processes
- Working with project data lead to agree gaps and cleansing / enrichment approach to legacy data
- Lead on data migration strategies
- Sign off of future state data structures and flows in collaboration with GPO's

**Requirements**

- Bachelor's or Master's degree in Computer Science, Information Systems, or a related field
- Experienced data architect with multi application and change experience
- Familiarity with D365
- Building global data solutions and platforms
- Experience of breaking data silos
- Good communicator and ability to explain data concepts to business users
- Experience of working with business leaders

- Fluency in English is mandatory

**How the process will look like**

Your teammates will gather all requirements within our organization. Then, once priority has been discussed, you will decide as a team on the best solutions and architecture to meet these needs. In continuous increments and continuous communication between the team and stakeholders, you're part of making data play
