

## Associate Analytics Engineer

### Description

As a part of the Digital Solutions team you will be responsible for continuous improvements in business intelligence and advanced analytics. You will lead the development of new digital products providing critical insights that help solve business challenges. The successful candidate will lead efforts to improve the Global Supply Chain data understanding across the organization through improved process, governance, and data management.

The ideal candidate is passionate about reinforcing a strong data foundation and adopting modern data architecture to support analytics today and into the future. The strong performer can expect further career advancement opportunities with Ecolab and will have the chance to move into other roles within IT organization, with increasing leadership opportunities. This is an exciting opportunity to advance your career with a stable growing company!
