Data Science – Trainee

Description

Job Title

Data Science – Trainee

Our department within the company comprises a cross-functional team of data scientists and data engineers dedicated to extracting value from the vast amounts of data we collect from airlines.

On one front, we focus on data preprocessing to make it accessible to other teams within the organization. Simultaneously, we collaborate with various teams to develop AI & ML solutions aimed at enhancing data-driven products to meet the evolving needs of our clients.

Job Description

As an intern within our team, you will have the exciting opportunity to work in an independent project focused on unlocking insights from a vast database of anonymized user profiles.

Your primary objective will be to leverage machine learning techniques to develop a segmentation solution driven by data.

In this project, you will dive deep into the complexities of the dataset, gaining a comprehensive understanding of user behaviors and preferences. Drawing upon your analytical skills, you will devise innovative approaches to segmenting the user base effectively. This segmentation solution will not only empower our clients to tailor their offerings more precisely but also serve as a valuable enhancement to other machine learning processes within our organization.

Throughout this project, you will have the autonomy to explore various methodologies, experiment with cutting-edge algorithms, and collaborate closely with our team of experts. Your contributions will play a pivotal role in shaping the future of data-driven decision-making within our company, making this internship an invaluable opportunity for personal and professional growth.
