

.Net Developer – Experian Data Quality

Description

Company Description

Experian unlocks the power of data to create opportunities for consumers, businesses and society. At life's big moments – from buying a home or car, to sending a child to college, to growing a business exponentially by connecting it with new customers – we empower consumers and our clients to manage their data with confidence so they can maximize every opportunity.

We gather, analyze and process data in ways others can't. We help individuals take financial control and access financial services, businesses make smarter decision and thrive, lenders lend more responsibly, and organizations prevent identity fraud and crime. For more than 125 years, we've helped consumers and clients prosper, and economies and communities flourish – and we're not done.

Our 22 000 people in 32 countries believe the possibilities for you, and our world, are growing. We're investing in new technologies, talented people and innovation so we can help create a better tomorrow.

Job Description

We are currently looking for a . **NET Developer** to join our Experian Data Quality Team.

The Address Data Quality team drive the direction of, and deliver enhancements to our real time and bulk address capture solutions (<https://www.edq.com/products/address-verification/>).

What you'll be doing?

As a member of our agile team you'll play a key part in shaping the future of our address data quality capabilities, react to the ever-changing needs of our users and constantly look for ways to work and deliver more effectively. Additionally, Senior Developers have the opportunity to influence the technical direction of the department.

- Learning and delivering a variety of solutions in a range of programming languages – C#.Net, with some Python/Powershell in the mix, as well;
- Taking ownership of all aspects of delivery to create products that customers love;
- Exploring new approaches and developing innovative solutions to customer needs;
- Demonstrating pride in the quality of your work through quality and testability of code, automation improvements and usability;
- Building a good understanding of the team's products and of user stories on the product backlog to enable effective participation in backlog grooming and sprint planning;
- Contributing to the continued evolution of a self-organising, cross-functional team in which all team members collaboratively deliver the highest priority enhancements;
