Data Analyst

Description

FARFETCH exists for the love of fashion. Our mission is to be the global platform for luxury fashion, connecting creators, curators and consumers. We're a positive platform for good, bringing together an incredible creative community made up by our people, our partners and our customers. This community is at the heart of our business success. We welcome differences, empower individuality and celebrate diverse skills and perspectives, creating an inclusive environment for everyone. We are FARFETCH for All.

COMMERCIAL / MARKETING We're a diverse team of Marketing professionals, spanning artistic and scientific expertise. We're driven to amaze our global community of customers through our data-driven approach, revolutionary spirit, test-and-learn culture and collaborative style.

LONDON Our office is located in Old Street, London's tech hub. With an open-plan space, ideal for collaborative working, an outdoor terrace for a team lunch.

We are seeking a highly skilled Data Analyst to join our dynamic team at Farfetch. As a Data Analyst, you will be responsible for interpreting data, analyzing results, and providing insights to drive business decisions and strategies. You will work closely with cross-functional teams to understand their data needs, develop analytical solutions, and communicate findings effectively. You will be a person who drives in solving complex problems in an entrepreneurial, fast-paced environment, balancing tactical needs whilst driving strategically for a long-term solution.

WHAT YOU'LL DO

- Lead the performance marketing channel providing technical expertise, roadmaps, workflow process management and prioritization
- Own experimentation across the performance marketing channel, driving data science programs and capabilities with the objective of delivering incremental ROI
- Conduct in-depth custom ad effectiveness studies and bespoke analyses to understand the relative impact of different marketing strategies across platforms and channels and provide valuable insights to stakeholders and leadership on an ongoing basis
- Lead in-depth analysis and presentation of insights to various teams and drive changes in measurement and attribution
- Juggle multiple projects and stakeholders delivering quick, agile progress and recommending priorities
- Communicate effectively with all levels of stakeholder to share insights concisely and accurately
- Add value to requests from business leaders and build logic that will
 produce analytical measures to tell the story of what is happening. This
 requires a strong understanding of business goals, processes and data
 flows, to 'be the voice of the customer', and do this transferably across
 projects
- Contribute to our Analytics Community; building relationships, defining ways
 of working, and helping us build our capability
- Be responsible for ensuring the accuracy of analysis, data and reports to ensure a high quality of standards.
