

Product Manager Integrations – take our data quality to the next level

Description

Job Req Number: 80394
Time Type: Full Time

Are you looking for the opportunity to develop your already finely-tuned integration skills even further?

Join us at DSV Road to help shape the future of our business by increasing our data quality and ensuring effective and efficient data transfer between internal and external parties.

"It's a huge, strategic transformation that we're working on, and getting our key data assets under control is a significant part of this, which means that you'll get to really impact this transformation journey," explains Massih Mayeli, Director of Data Management.

Make a difference as part of our integration team

Regardless of whether you join us at our HQ in Hedehusene or one of our other offices in Europe, you will be warmly welcomed into DSV Road Business Change Management. We are responsible for leading, executing, and governing all transformation initiatives within DSV Road.

Joining us, you become part of our Data Management department, where we work with BI, Integration, Data Governance and Data Management. Here, you will be taking centre stage within our Centre of Excellence team where you will work with 5 colleagues on internal and external integration initiatives. Doing so, you will join a very international setting with BCM colleagues in Denmark and most European countries.

"We're striving towards building a data-driven culture and share a passion for making transformation and creating value, and we do so as a team working together," Massih goes on to say.

Optimise data flow for seamless business processes and automation

Date posted

May 14, 2024

As our new product manager, you can look forward to working on business projects. You will ensure that data processes and quality are up to par and that we have the needed capabilities in place for the next level of maturity.

The projects you will be part of vary in size and scope but typically run for 6 months or more as you work with various integration initiatives. You could for instance be working on initiatives to connect our operational systems with external systems from our customers, data integrators or subcontractors.

More specifically, you will:

- Manage the full lifecycle of integration initiatives from conception through to completion
- Ensure compliance with the connectivity governance to promote standardisation in DSV Road
- Analyse complex systems and business processes as well as identify integration challenges
- Collaborate with BCM departments and colleagues, e.g. Product and Process Owners in developing standard solutions and processes, with standardisation of data as the foundation

Experienced integration specialist with a solid business sense

With solid collaboration skills, you are good at building relationships and managing stakeholders. You always have the eye on the ball when it comes to creating business value, using your solid business sense and savvy analysis skills to dissect complex systems and spot business pains.

Moreover, we imagine that you:

- Bring a few years of experience in data integrations seen from a business process view
- Have experience implementing data integrations within a large matrix organisation
- Have technical expertise and perhaps even knowledge of the transportation industry
- Have experience in integration formats like EDIFACT and JSON and connectivity methods like API
- Speak and write English effortlessly

Want to know more and apply?

We will be happy to answer any questions you may have regarding the position and about your options in DSV. You are welcome to call Director, Data Management Massih Mayeli on + 45 22 12 66 18.

We look forward to receiving your application via the link below as soon as possible. We will process the applications as we receive them.

DSV – Global Transport and Logistics

DSV is a dynamic workplace that fosters inclusivity and diversity. We conduct our business with integrity, respecting different cultures and the dignity and rights of individuals. When you join DSV, you are working for one of the very best performing companies in the transport and logistics industry. You'll join a talented team of approximately 75,000 employees in over 80 countries, working passionately to deliver great customer experiences and high-quality services. DSV aspires to lead the way towards a more sustainable future for our industry and are committed to trading on nature's terms.

We promote collaboration and transparency and strive to attract, motivate and retain talented people in a culture of respect. If you are driven, talented and wish to be part of a progressive and versatile organisation, we'll support you and your need to achieve your potential and forward your career.

Visit [dsv.com](https://www.dsv.com) and follow us on [LinkedIn](#), [Facebook](#) and [Twitter](#).

How the process will look like

Your teammates will gather all requirements within our organization. Then, once priority has been discussed, you will decide as a team on the best solutions and architecture to meet these needs. In continuous increments and continuous communication between the team and stakeholders, you're part of making data play an even more important (and understood) part withing Brand New Day.
