

Senior Power BI Engineer

Description

Company Description

We're ASOS, the online retailer for fashion lovers all around the world.

We exist to give our customers the confidence to be whoever they want to be, and that goes for our people too. At ASOS, you're free to be your true self without judgement, and channel your creativity into a platform used by millions.

But how are we showing up? We're proud members of Inclusive Companies, are Disability Confident Committed and have signed the Business in the Community Race at Work Charter and we placed 8th in the Inclusive Top 50 Companies Employer list.

Everyone needs some help showing up as their best self. Let our Talent team know if you need any adjustments throughout the process in whatever way works best for you.

Job Description

ASOS is a unique and forward-thinking company and understands the opportunities data and technology have on driving the business forward. Data and analytics remain a key priority focus area and the Business Intelligence team will be at the heart of driving new insights within the organisation.

You will need to have a real passion for BI, and a desire to work with the latest technologies. You will be driven and excited about Power BI development, bringing ideas to the table and influencing and guiding others on the journey. You will play a key part in leading the delivery of Power BI solutions and driving insight.

What you'll be doing:

- Ingesting data from a variety of corporate data sources and performing required transformations in the Power BI query editor.
- Data modelling capabilities, including designing effective BI data models in line with the Kimble methodology.
- Developing calculations in DAX which are accurate and performant on large datasets.
- Developing visual reports, KPI scorecards, and interactive dashboards using Power BI desktop.
- Reviewing existing Power BI reports (working with Power BI analyst) to determine which factors most affect performance.
- Good understanding of managing and monitoring usage, data refreshes and security features.
