

Internship Data Analysis in Semiconductor Manufacturing

Description

Company Description

At Bosch, we shape the future by inventing high-quality technologies and services that spark enthusiasm and enrich people's lives. Our promise to our associates is rock-solid: we grow together, we enjoy our work, and we inspire each other. Join in and feel the difference.

The Robert Bosch Semiconductor Manufacturing Dresden GmbH is looking forward to your application!

Job Description

- You are enthusiastic about the challenges of intelligent data analysis, from visualization and statistics to machine learning? During your internship, you will get familiar with the analysis requirements of a fully automated semiconductor production facility and focus in particular on the application of transformer models (machine learning) for the classification of texts, data and images.
- Working in a team consisting of analysts, data scientists and automation experts, you will gain insight into various aspects of data usage in semiconductor manufacturing and assist with day-to-day tasks.
- You will work with big data technologies and modern analysis software, develop your own analyses and contribute to the documentation and user support of this software.

Qualifications

- **Education:** Master studies in the field of Mathematics, Statistics, Computer Science, Physics, Automation Technology, Mechanical Engineering or Comparable
- **Experience and Knowledge:** strong understanding of data, statistics and machine learning; good programming skills in a scripting language (e.g., Python) and experience with common ML libraries such as [PyTorch](#) or TensorFlow; basic understanding of transformer models in the field of machine learning is an advantage
- **Personality and Working Practice:** a team player who is flexible, motivated, resilient, a good communicator, a problem solver, independent, result-oriented and reliable
- **Languages:** very good written and spoken English, German is a plus

Additional Information

Start: from October 2024

Duration: 6 months

Requirement for this internship is the enrollment at university. Please attach your CV, transcript of records, enrollment certificate, examination regulations and if indicated a valid work and residence permit.
