(Senior) BI Developer

Description

At FREENOW we are at an exciting point in our history – we are building a world-class product that is being used daily by more than a million people. We are a part of one of the most dynamic spaces for innovation in today's world: shaping mobility. Our daily business is solving large-scale, complex problems – and we love it!

As a BI developer in the Data Enablement team at FREENOW you will become a part of our core team of Data experts. You will develop and improve FREENOW's data stack, tooling and reporting platform and will be supporting all Data roles in the company to bring them to the next level.

YOUR DAILY ADVENTURES WILL INCLUDE:

Automation and tooling focus

- You will own and develop automations to speed up the data delivery throughout the company: chatbots, automation jobs, slack integration, web services, …
- You identify Data requirements of the business and translate it into functional requirements for Data engineers and help improving the Data platform's performance
- You develop tooling using the following technologies: Python, Flask, various APIs, Git

Reporting focus

- You own our main Data visualisation tools (such as Tableau) and are responsible for an optimal environment and the continuous automation and modernisation of the platform
- You maintain our Tableau Server to ensure accessibility, reliability and GDPR compliance
- You document, maintain and structure our usage of Tableau and Metabase reporting platforms

Support and Data Literacy Focus

- You are the first contact for analysts for structural support (Reporting infrastructure, Data visualisation tools, etc.)
- You communicate with various stakeholders within the Data teams and the broader organisation in order to translate business needs into Data solutions
- You educate end users to expand their capabilities and make data-driven decisions using the tools we provide

TO BE SUCCESSFUL IN THIS ROLE:

- Degree in Business studies, Computer science or another subject with a significant mathematical, statistical or scientific focus (or significant professional experience in these areas)
- Professional experience in Tech, Analytics, Data or a related field
- Excellent knowledge of Python, Flask, various APIs, Gitv
