

BI Developer

Description

On behalf of our client, an innovative global leader in onshore and indoor aquaculture, we are currently looking for a creative and passionate **BI Developer** to join its team.

Your day-to-day

- Conceptualize, analyse and implement data analysis solutions. You will be responsible for the full cycle, from analysis of business needs to the design of the solution, implementation of the data extraction and transformation queries and finally development of the SSIS/SSAS/DAX/Power BI solution.
- Design and develop powerful and interactive visualisations to support decision making.
- Collaborate with business experts and users in order to validate the developed solutions, receive feedback and get an in-depth understanding of the needs of the industry.
- Propose new features or even whole new solutions/products
- Analyse customer requirements and assist in preparation of proposals
- Create and maintain documentation on the developed BI solutions
- Continuously research and stay up-to-date on the latest BI developments

Requirements

- Degree in Information Technology, Engineering, Mathematics, or similar.
- 2 years of experience with SSIS/SSAS (Tabular and Multidimensional), DAX; knowledge in PowerBI will be considered as an asset
- Strong knowledge in Relational and Dimensional database structures
- Excellent SQL knowledge
- Analytical mind with problem-solving aptitude. Ability to collect client requirements, understand them and turn them into a powerful BI solution including cubes and attractive Power BI visualizations

Benefits

You will be part of a company with amazing culture, people orientation, strong team work and plenty of room for career and personal development. Among others, the main perks are:

- Competitive Remuneration Package
- Private Health Insurance Plan
- A vibrant, innovative environment where creativity and autonomy are at the heart of what you will do
- Continuous learning and development opportunities to keep you at the forefront of technology and industry trends
- A team that promotes innovation and self-initiatives

How the process will look like

Your teammates will gather all requirements within our organization. Then, once priority has been discussed, you will decide as a team on the best solutions and
