Data Analyst II

Description

Your Opportunity

As a Data Analyst in our Merchant Experience domain, you'll make sure that data is at the heart of product development for our merchant dashboard, mobile app, and support experience.

You will work closely alongside the domain's leadership team and software engineers to ensure we collect and store the right data. Then working alongside other data professionals, you'll build robust data models, perform in-depth analyses and tell compelling stories to steer our product teams in the right direction.

What you'll be doing

- **Product development**: work closely with the domain leadership team and engineers to make sure our products synthesise the data required to measure product performance.

- **Product analytics**: dive deep into frontend / behavioural event data to identify friction points, growth opportunities and other potential product levers.

- **Data storytelling**: turn your insights into compelling stories and share them via presentations, blog posts, memos, dashboards, workshops, or whatever works best!

- **Business Intelligence**: build and maintain robust, performant data models (dbt + Looker) to empower your stakeholders to report their most important product KPIs.

- **Craft development**: contribute to the evolution of the data analytics craft by sharing your insights, challenges and being a vocal member of the community.

What you'll bring

- 2+ years experience as data analyst or data scientist using data to drive product success

- Strong problem solving skills and attention to detail

- Proactive, pragmatic and have a 'can do' attitude

- Strong stakeholder management and communication skills

- Fluency in SQL (we use BigQuery) and experience with dbt
