

Cloud Solution Consultant-Hybrid

Description

As a cloud solution consultant, you're capable of deciphering the true business question of a client and translating it into a tangible cloud solution within a short cycle. You closely collaborate with Company's Managing Consultants and engage at the C-level with our clients. You can contribute to different phases of a project (design, delivery, run). This entails identifying technological and organizational cloud trends in the market and shaping their potential business value, crafting new customer solutions together with the client (either large programs or small initiatives), conducting bottom-up examinations of existing projects, identifying improvements, and automating manual processes. Additionally, you build and maintain relationships with our clients and inspire our cloud community of junior, mid-level, and senior cloud engineers/consultants.

Responsibilities

Key Responsibilities:

- Identify cloud technological and organizational trends to ensure the company remains at the forefront of innovation.
- Shape new customer solutions by leveraging cutting-edge cloud technologies and best practices.
- Investigate existing projects to identify areas for improvement and optimization.
- Automate manual processes to increase efficiency, reduce errors, and enhance overall productivity.

Qualifications

IDEAL CANDIDATE

- You think in concepts but also have an affinity for execution.
- You have a bachelor's/master's degree in computer science, mathematics, or electrical engineering.
- Experience in consultancy.
- Extensive knowledge of Microsoft Azure, Amazon Web Services (AWS), Google Cloud, and related concepts such as cloud cost management.
- Additionally, you have expertise in one or more IT domains: connectivity, identity and access management, security, governance.
